

China's National Reimbursement Drug System

Overview, Drug Listings and Pricing

Key Features

- Covers all chemical drugs included in the reimbursement drug list
- Complete listings by ATC (Anatomical Therapeutic Chemical) classification
- Prices for 2,349 products awarded through public tenders
- First publication of the government-recommended "Commercial Health Insurance Innovative Drug List"
- More than twice as many listed drugs as 25 years ago

Report Overview

In December 2025, the Chinese government published the "Medical Insurance Drug List" (commonly known as the National Reimbursement Drug List, or NRDL), effective January 2026. The NRDL is one of the most important considerations for global companies doing business in China. As China's medical insurance system continues to expand, reimbursement-listing trends are drawing increasing attention.

This report summarizes the reimbursement system, all listed drugs, and pricing (reimbursement price) information. Products from overseas companies now account for more than 30% of drugs covered by medical insurance. Whether already manufacturing and selling in China or considering entry into the market, overseas companies can use this report to see how many of their own products are included on the NRDL. An essential reference for global companies.

- 1. Prices of Drugs on the Price-Negotiated Drug List (82 Item)
- 2. List of products and prices under volume-based procurement (2349 Item)

Chapter 4: Private Health Insurance Drug List

Commercial Health Insurance Innovative Drug List (19 Item)

Overview of the National Reimbursement Drug List

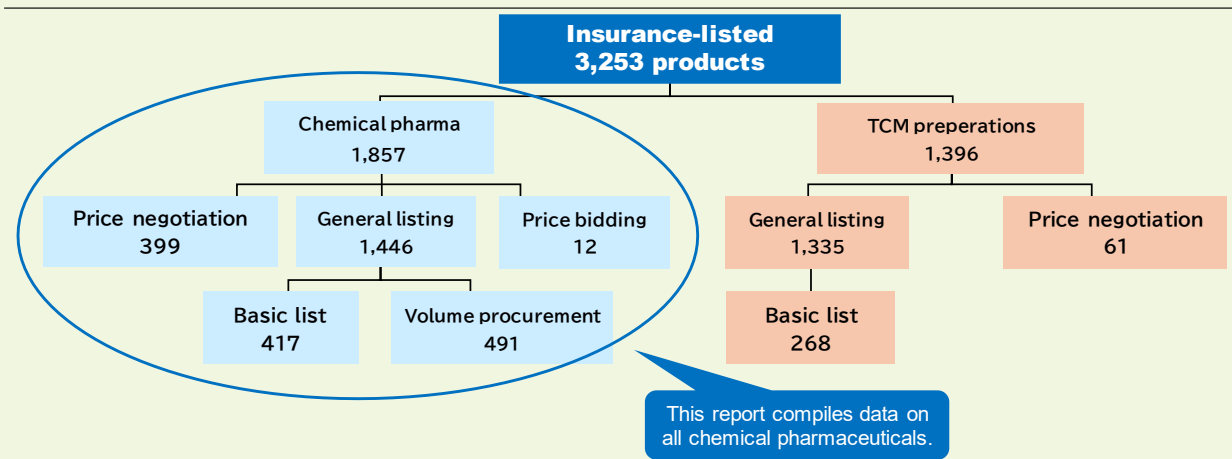

On December 7, 2025, the National Healthcare Security Administration (NHSA) and the Ministry of Human Resources and Social Security (MOHRSS) released the 2025 National Drug Catalogue for Basic Medical Insurance, Maternity Insurance and Work-related Injury Insurance (the NRDL; hereinafter, the "Insurance List") and the Commercial Health Insurance Innovative Drug List (the "Commercial List"). Both lists have applied since January 1, 2026. The Commercial List was newly established this year and covers drugs reimbursed by private insurance.

The 2025 Insurance List contains 3,253 drug products, excluding crude drugs, an increase of 94 products from the 2024 edition. The total consists of 1,857 chemical drugs, including small-molecule drugs and biological products, up by 92 products, and 1,396 TCM preparations, up by two products. Since the Insurance List was first implemented in 2000, the total number of products has more than doubled over 25 years.

Composition of the NRDL

The composition of the 2025 Insurance List is shown below. TCM preparations account for 42.9% of the total, down 6.5 percentage points from the peak of 49.4%. Listed chemical drugs are classified into products listed through price negotiation, products listed under general listing, and products listed through price bidding. Price-negotiated products are those for which companies and the government agree on a price through negotiation. General-listing products are listed at the government's discretion, and the medical security authorities set the payment standard (price). Price-bidding products are priced through competition among companies. This report compiles prices for selected price-negotiated chemical drugs, price-bidding products, and products awarded through volume-based procurement tenders.

Composition of the 2025 NR

Overview of the Nationally Negotiated Drug List

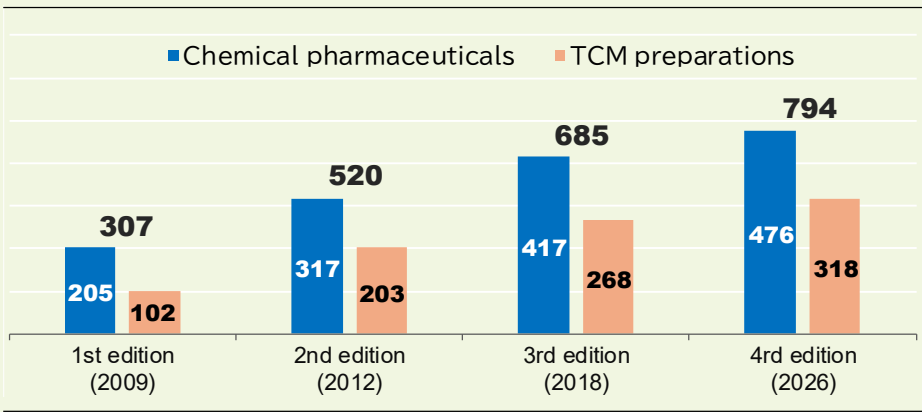

In recent years, companies have been required to conduct "price negotiation" with the government in order to have drugs listed in the Insurance List. The most recent price negotiations were held over five days, from October 30 to November 3, 2025, and involved 127 products from 120 companies. Of these, 112 products were successful and were newly listed in the Insurance List.

Price Negotiation Results and Average Reduction Rate

Of the 112 products, 105 were chemical drugs and seven were TCM preparations, with chemical drugs accounting for the overwhelming majority. By therapeutic class, antineoplastic agents represented the largest group, with 36 products, followed by anti-infective agents with 13 products and diabetes drugs with 12 products. These three major therapeutic classes accounted for more than half of the total._

Changes in Products Listed in the “Essential Medicines List” by Category, 1st–4rd Editions

National Reimbursement Drug List (1,446 Item)

NRDL (2025 edition, 1446 Item)

ATC code	Classification of drugs	Cat.	No.	Drug Name	Dosage form
A	ALIMENTARY TRACT AND METABOLISM				
A01	STOMATOLOGICAL PREPARATIONS				
		A	1	compound borax	topical solution
				复方硼砂	
		B	2	rice bran sterol	immediate-release oral dosage forms
				糠甾醇	
		B	3	clotrimazole	immediate-release oral dosage forms
				克霉唑	
		B	4	chlorhexidine	topical solution
				氯己定	
		B	5	tinidazole	topical solution
				替硝唑	
		B	6	cetylpyridinium chloride	topical solution
				西吡氯铵	
A02	DRUGS FOR ACID RELATED DISORDERS
